P514 · AUDIT

PROFILE COMPLETENESS · 4 JUL 2026

Scope. Every player who has appeared in a match in the last 90 days (59 in total). Seven player-owned profile attributes checked (photo · age · fav club · primary + secondary position · foot · **match-night notifications**). Sorted by **gaps** → **most missing at the top** so the chase list surfaces first. Live pull as of today.

Live version. A committee-facing HTML page renders this same table live from the DB — admin logs in to the app and hits [Admin](#) → [Audit](#). Every profile update reflects instantly. This PDF is the print-friendly snapshot.

► How we're closing the gap

Just shipped · ProfileCompletionCard

LIVE ON NEXT GAME · 4 JUL 2026

Everyone who signs into Next Game with at least one profile gap sees a single green "Complete your card" banner at the top of the page. It shows a progress bar (N of 6 done) and one tappable row per missing field. Position, backup position, foot and age band can be picked inline; photo and favourite club deep-link to the Profile page. The banner auto-hides at 6 of 6 and is dismissable per session.

This replaces the two standalone position + foot nudges that were doing the same job less coherently. One banner instead of three.

Complete your card

3 / 6 done · 3 to go

What each row does

- **Position** · inline 4-button picker (GK / DEF / MID / ATT)
- **Backup position** · same picker, second tap = secondary
- **Foot** · inline 3-button picker (LEFT / RIGHT / BOTH)

▪ Age Exact DOB on Profile — or a decade below	SET
Backup position Where can you cover if needed?	SET
Profile photo Puts a face on your card.	PROFILE →

- **Age** · inline 5-band picker (U20 / 20s / 30s / 40s / 50+), with a link to Profile for anyone happy to share exact DOB
- **Photo** · deep-link to Profile page (photo upload flow)
- **Favourite club** · deep-link to Profile page (long club dropdown)

All saves are instant. Progress bar updates live. Dismiss × hides it for this session only — it comes back next login until 6 of 6 done.

► Expected impact on the numbers above

- **Notifications (7% → target 40%+)**: brand-new field. Now driven by both the WhatsApp share-the-guide play (primer 18) and the in-app Match-night notifications card on the Profile page. Each opt-in is one push notification per Thursday cycle — group's engagement lift depends on this number climbing.
- **Foot (5% → 14% today → target 60%+)**: up 5 already since the ProfileCompletionCard shipped. Single tap for the vast majority of the squad who know their foot.
- **Secondary position (5% → 8% today → target 40%+)**: up 2. Now the fifth of only six rows anyone with a gap sees on their Next Game tab.
- **Photo (34% → target 60%+)**: "PROFILE →" link is one tap, upload takes 20 seconds. Committee steer welcome on whether we surface a specific "photo of the week" nudge on the Cards tab.
- **Favourite club (29% → 31% today → target 50%+)**: should track photo closely — one is not much harder than the other once someone's on the Profile page.
- **Age (88% → target 95%+)**: already high because of the band fallback. The 7 red X players are almost all inactive-ish WTPs with minimal profile — chasing them by name is more effective than another nudge.

A follow-up pull in 2 weeks will show how much the banner has moved the needle. This audit was baseline; the next one will be delta.

Committee steer → chase list obvious from the top of page 2 · foot nudge already shipping to catch it in-app.
