

WANSTEAD FELLAS

THE FELLAS' GUIDE · V3

P001 · GUIDE

What this is — everything the app does, why it exists, and how it helps you. Six pages, designed to be skim-read. Keep it on your phone.

► What the app is for

The app is built on five pillars. Every feature belongs to one of these — that's how to make sense of the menu.

OPERATIONS

Sign up, build fair teams, capture scores. The boring backbone — done well so nobody thinks about it.

STATS THEATRE

Leaderboards, podiums, MOTM/DOTD, banter-fuel. Make every Thursday feel like a season finale.

IDENTITY

Your Top Trumps card · position · badges · cuntiness · club. Your in-app persona.

FAIRNESS

Balanced teams, tier-based bumping, auto WTP fees, transparent rules. Removes admin from the firing line.

COMMUNITY

World Cup hub, sweepstake, pods, history. Glue that keeps the group together between matches.

► Quick start (5 minutes)

- 1 Open the app link your captain sent you.** Tap [Sign up](#) → email + password. Confirm your name. You're in.
- 2 Install on your home screen** so it behaves like a proper app: iPhone Safari → share → [Add to Home Screen](#); Android Chrome → menu → [Install app](#).
- 3 Pick your position** — first time you visit [Next Game](#) you'll see a one-tap prompt for GK · DEF · MID · ATT. Picks a primary and (optionally) a backup. Helps the auto-balancer build fairer teams.

► The five tabs

	Next Game	Teams	Match	Stats	World Cup
Next Game	Mark yourself In or Out . See the playing list, reserves, weather, kick-off, who's missing.				
Teams	From Wednesday evening — your team, team colours, your captain.				
Match	Tonight's live score, voting (MOTM/DOTD), match report Friday morning.				
Stats	Top scorers · awards · The Wall · winning team · distance · fines. Full leaderboards by category.				
World Cup	(Tournament only) Predictor, sweepstake, your picks.				

A **More** menu (⋮ top-right) holds your profile, history, cards gallery, pods, feedback and a few extras. Page 5 covers them.

► Your week in three days

WEDNESDAY

► What you'll see

- **Masthead row** — weather, signup count, format (7v7 / 9v9 etc).
- **Position nudge** — only if you haven't picked. One tap to set, saves instantly.
- **Big I'm In / Drop Out** — green when you're in, yellow when on the waiting list, magenta when bumped to reserves.
- **My Squad pill** — if you manage a kid's account, their In/Out toggle is a small pill next to yours.
- **Search box** — type a name to jump.
- **Who's In · 14** — the playing list. [Your row is highlighted in green.](#)

► Player tiers — the dots on every row

S **Subscribed** · pays monthly · **★ WTP+** · priority casual, £5/game · **WTP** · casual, £5/game

Fairness rule: who bumps who

When the game's full, the priority order kicks in:

- **Subscribed** can bump **WTP+** and **WTP** (newest-confirmed first).
- **WTP+** can bump **WTP** only.
- **WTP** joins the waiting list.

If anyone drops out, the top reserve gets auto-promoted instantly. No admin action needed.

► Common how-tos

The match is full

You join the **reserves** (yellow status). The list is auto-ranked by tier + signup time. If someone drops, the top reserve gets bumped in.

Sign up your kid

If admin has linked your child to your account, you'll see them as a small pill next to your I'm In button. Tap to sign them up; tap again to drop.

Drop out

Tap your green **I'm In** button → confirm. If anyone's waiting, your slot goes to the top reserve automatically. [You may not get your spot back.](#)

Miss the 10pm Wednesday deadline?

Sign-ups lock. The captain can still slot you via admin tools if there's room — ping in WhatsApp.

Why was I charged £5?

If you're a WTP or WTP+ player, signing up confirmed automatically logs a £5 fee for the night. Drop out before kick-off and the (unpaid) fee is reaped. See page 4.

Your status is always written on the big button:

✓ **I'm In** · **On the Waiting List** · **Reserve (was confirmed, got bumped)**

P301 · GUIDE

▶ Teams (Wednesday evening onwards)

Once admin publishes the teams (Wed 10pm onwards), the [Teams](#) tab shows your line-up, team name, team colours and captain. **Captain** is auto-picked from the top three rated players via a random draw — so the same person doesn't always wear it. Auto-sizing picks the format based on confirmed players (32 → 4×8, 22 → 2×11, 18 → 2×9, 10 → 2×5, etc.).

▶ Match (Thursday night)

While the game's on, the captain enters scores live. At full time, the **voting card** opens at the top of the Match tab.

Search 32 players...

Beau Samuels 2 ● ○
Edward Ezra ○ ●

- **One row per player** — tap for MOTM and for DOTD. Both votes in one scroll.
- **Goalscorers sort to the top** with a tag so MOTM candidates surface without scrolling.
- **Search** filters live.
- **Change your mind** any time until 10am Friday.
- **Two pills top-right** show your progress: ✓ MOTM cast, ✓ DOTD cast.

Friday: the match report

The report drops on the Match tab Friday morning. Block order:

1. **Group table** — final standings for the night
2. **Predicted vs Actual** — table snapshot vs the night-before forecast
3. **Results** — each fixture's score with scorers
4. **Match Awards** — MOTM + DOTD with vote counts
5. **Match Report** — summary, key highlights, banter, app watch

Older reports live on [History](#) (under More) — same layout when you expand a row.

▶ Stats tab — the league leaderboards

The Stats page is a dashboard. The top section always shows three **hero cards** with the season leaders. Each panel underneath shows its top-3 podium right under the title.

Top Scorer · Beau Samuels

14 goals

Wall King · Mark Pearson

1.50 GA/night

Podium under every panel · gold/silver/bronze for top 3 · expand for the full table

1	Beau Samuels	14 goals
2	Josh Edwards	10
3	Mikel Winter	9

SECTION	WHAT'S IN IT
Attack	Top Scorers
Awards	Man of the Match · Winning Team (with current streak)
Defence	The Wall — goals conceded per night (lower = better)
Participation	Appearances · Distance / Game · Total Distance
Shame	Dick of the Day · Fines

Top controls: This Month / All Time toggle flips the whole page; My Stats pill jumps to your card.

Identity layer

On top of the stats your card carries:

- **Position chip** — your preferred position, plus a backup.

MID

ATT

- **Badges** — earned over time:

SUPER SHARP SHOOTER

LEGEND

CAPTAIN

- **Cuntiness rating** — banter-only, set by admin:

NUISANCE

CUNT

- **Favourite club badge** — picked from Profile; appears on your card.

► Match Fitness

On your Profile, tap + **Add match fitness**. Either:

- **Upload a .gpx or .tcx file** from your watch app (Polar, Garmin, Strava). The app reads distance, duration, max speed, avg HR, HR zones automatically.
- **Type the numbers in** by hand if you didn't track.

Re-uploading for the same date **replaces** the previous entry. Distance feeds the leaderboard; the rest will power smarter card attributes (see page 6).

THE REST

HISTORY · CARDS · PODS · WORLD CUP · FEEDBACK · MONEY

P801 · GUIDE

▶ History

Every past Thursday in chronological order. Tap a row to expand — same layout as the Match tab (table → predicted vs actual → results → awards → report). Great for re-living the worldie you scored 4 weeks ago.

▶ Cards (the gallery)

Every player's Top Trumps card in one place. Browse, compare, screenshot for banter. Admin can edit ratings here too.

▶ Pods

Curated football podcasts + news feed. Your **favourite club** (set on Profile) gets its own section at the top — your club's official pods plus the wider Wanstead Fellas list.

▶ Feedback

Bug? Feature request? Design gripe? Send it through the Feedback page. Categories:

- **Bug Report** — broken thing, which screen.
- **Feature Request** — what you'd love to see.
- **Design Feedback** — looks off / could look better.
- **General** — anything else.

Admin reviews them weekly. Most of v3 of the app came from feedback like this.

▶ World Cup (during tournaments)

Appears as the 5th bottom tab while a tournament's running. Four sub-tabs:

Hub	Today + tomorrow's fixtures with your picks · leaderboard preview
League	Full standings · % hit-rate across all settled matches
My Picks	Your scorecard — what you picked, what's still locked
Sweep	£240 sweepstake digitised · ownership grid · Most Conceded · Most Reds · your teams highlighted

Picks lock 5 min before kick-off. Miss it and that match counts as a wrong pick — the league denominator is **all settled matches**, not just the ones you predicted. Set a reminder for early-morning games.

▶ My Finances

Open via **More** → **My Finances**. Three sections:

- **Outstanding balance** hero — big number, red if owed, green if clear.
- **WTP Games This Month** — for casual players, a £5 fee auto-logs when you sign up confirmed. Shows count + £ total + per-game list.
- **Outstanding Fines** — late (£2), drop-out (£2), lost ball (£3), cuntiness (£5).
- **Paid items** — collapsible history, opens on tap.

You owe nothing automatically. Even WTP fees show as **unpaid** until admin marks them paid. Tap "All clear ✓" to confirm.

▶ Admin (admin-only)

Hidden for everyone else. Four tabs:

- **Players** — edit any player's stats, card, GK attrs, position, club, age, type, badges, photos. **Position Adoption Tracker** at the top shows who still hasn't picked a position (chase list).
- **Finance** — fines + WTP fees, mark paid, delete, CSV export by month.
- **Families** — link parent ↔ child profiles.

- **Feedback** — review submissions.

UNDER THE HOOD

HOW FEATURES DRIVE YOUR ATTRIBUTES · TODAY + TOMORROW

P902 · GUIDE

Your card and the leaderboards are powered by a mix of what admin enters and what the app captures from your actual play. Here's the honest split.

► Where the data comes from today

ADMIN set by admin · **YOU** set by you · **LIVE** auto from match data · **SOON** next phase

YOUR DATA	HOW IT'S SET TODAY
Card 6 attrr (pace · shooting · etc.)	ADMIN set when you joined, edited periodically
GK 6 attrr (reflexes · handling · etc.)	ADMIN
Overall rating	ADMIN flat number
Card tier (gold / silver / bronze)	LIVE derived from overall (≥ 9 , ≥ 8 , ≥ 7)
Badges	ADMIN Captain is auto-assigned by the team builder
Cuntiness	ADMIN banter-only, not derived from votes
Preferred position	YOU via Profile or the Next Game nudge
Top scorer leaderboard	LIVE from goals you scored
MOTM & DOTD counts	LIVE from squad votes
Winning Team + streak	LIVE from match outcomes × your team
The Wall (GA/night)	LIVE goals conceded by your team, min 3 nights
Appearances	LIVE from rostered confirmed signups
Distance / Game · Total Distance	LIVE from your GPX/TCX uploads
Auto WTP fees (£5/game)	LIVE trigger fires on confirmed signup
Fines	ADMIN issued match night

► Where this is heading

Card stats are about to come alive. Once the rating engine ships (next phase), the same six attributes will be driven by your actual play:

CARD ATTRIBUTE	WILL BE DRIVEN BY
SHO Shooting	SOON goals / appearance (with form decay)
DEF Defence	SOON inverse of avg GA/night + clean-sheet bonus
PAC Pace	SOON max speed from your GPX/TCX
PHY Physicality	SOON total distance × HR-zone workload
PAS Passing	SOON peer-rating signal (a future "rate your squad" tap-flow)
DRI Dribbling	ADMIN stays admin-set (no honest signal yet)
Overall	SOON position-weighted blend, not a flat mean
Form modifier	SOON rolling 4-match peer rating

Each card will get a **form arrow** (↗ / ↘) and a "Why this rating?" tooltip showing the breakdown, so nobody has to guess where the number came from.

► Behind the scenes (things you'll never notice)

- **32-cap enforced server-side** — even if two players hit Sign Up at exactly the same moment, one goes to reserves.
- **WTP £5 auto-charged** the instant you flip to confirmed; auto-reaped (unpaid only) if you drop out before kick-off.
- **World Cup scores** pulled every 30 minutes from football-data.org. Admin-entered results are never overwritten.
- **Realtime sign-ups** — the playing list updates live without you needing to refresh.
- **PWA offline cache** — the app still opens with no signal; just won't show fresh data.
- **Position Adoption Tracker** (admin) — chase list for anyone who hasn't set a position.

► When something looks wrong

1. **Force-refresh.** iPhone: swipe up, re-open. Desktop: **Cmd+Shift+R**. Fixes 90% of "weird" data.
2. **Check signal** — most live features need it.
3. **Still wrong?** Drop the admin a message: **pabarham@gmail.com** or in the WhatsApp group, with a screenshot.

That's the lot · five pillars · six pages · one shared Thursday night.
