

SQUAD RATINGS AUDIT

Nineteen players are running on flat 7s with no card stats, and nine more look out of step with what they have actually done on the pitch. Fill this in by hand and send the numbers back.

Fill the six card stats, not just Overall

The balancer only reads card stats when card_pace is set. If you enter Overall on its own, the team draft carries on seeing a flat 7 while the star cap and the RTG chip use your new number - the two halves of the balancer end up disagreeing. Scale is 1-10; the squad currently runs 4-10. Overall also does double duty: Stamina, Aggression, Composure and Work Rate are all derived straight from it, because there is no card stat for those four.

RATE THESE

Everyone here has all nine base attributes sitting at the default 7 and no card stats at all. Positions marked NO POSITION need setting too - the balancer's swaps are position-matched, and a player without one drops into a catch-all bucket that quietly blocks both the star cap and the age spread from fixing any team he is on.

REVIEW THESE

These are already rated, but the numbers sit awkwardly against the record. This is inference, not fact: all I can see is goals, MOTM votes and DOTDs - no assists, no defensive actions, no minutes. MOTM votes are the only peer-judged signal available, and they track popularity and winning teams as well as ability. You have watched the games; treat these as prompts, not corrections. Leave the box blank to keep a rating as it is.

POSSIBLY UNDER-RATED

Rory Wilson

MID 5 apps 2 goals 1 MOTM 8 votes

1.60 votes per game - the highest rate in the whole squad. Only 5 appearances, so treat with some caution.

NEW OVR

8 ->

Callum Finch

GK 17 apps 0 goals 2 MOTM 12 votes

Most-recognised keeper you have: 2 MOTM wins and 12 votes, yet rated below Peter May.

7 ->

NEW OVR

Paul Finch

GK 17 apps 0 goals 1 MOTM 10 votes

10 votes and a MOTM across 17 games. Same story as Callum.

7 ->

NEW OVR

Mark Pearson

DEF 8 apps 1 goals 0 MOTM 2 votes

0.25 votes per game - a better recognition rate than several players rated 7 and 8.

6 ->

NEW OVR

POSSIBLY OVER-RATED

Peter May

GK 8 apps 1 goals 0 MOTM 0 votes

Zero votes and zero MOTM in 8 games, yet rated above both Finches. The clearest mismatch in the data.

8 ->

NEW OVR

Noah Higgins

ATT 17 apps 12 goals 0 MOTM 2 votes

Scores well (0.71 a game) but has the lowest peer recognition of any 9 - no MOTM wins, 2 votes in 17 games.

9 ->

NEW OVR

Michael Farley

MID 17 apps 11 goals 1 MOTM 5 votes

0.29 votes per game and 5 DOTDs, the joint-most in the squad.

9 ->

NEW OVR

Pete Healey

MID 9 apps 2 goals 0 MOTM 1 votes

2 goals and 1 vote in 9 games - the weakest output of the 8-rated midfielders.

8 ->

NEW OVR

Gary Edwards

DEF 10 apps 1 goals 0 MOTM 2 votes

Modest on every measure available.

8 ->

NEW OVR

Two that look odd but I would leave alone

Aaron Franklin (ATT, 8) has zero MOTM votes in 9 games, which looks alarming until you see 8 goals in those 9 - the rating holds up. Lawrie Pointer (DEF, 9) has just one vote, but 6 goals in 6 games from defence is exceptional, and he is one of the few with hand-curated attributes rather than card stats.

THE ONE I WOULD PUSH YOU ON

Your three keepers, ordered by how often team-mates voted for them. Peter May is rated above both Finches on zero votes and zero MOTM wins across 8 games, while Callum has the best vote rate of any keeper and two MOTM wins. Whichever way you correct it, the current order looks wrong - and it matters more than most, because GK distribution is a hard constraint in the balancer, so a mis-rated keeper skews his whole team's rating sum every single week.

KEEPER	OVERALL	APPS	MOTM	VOTES	PER APP
Callum Finch	7	17	2	12	0.71
Paul Finch	7	17	1	10	0.59
Peter May	8	8	0	0	0.00
