

WHAT'S NEW · SEPT 2026

PREVIEW · NOT YET BROADCAST

P801 · PREVIEW

For your eyes first. Everything below is live on the app right now but hasn't been announced to the group yet. Have a play, and let me know anything that reads badly or works differently to how you'd expect — I'll fix it before pushing to everyone. Announcements go out one at a time over the next fortnight so it doesn't blur into "the app changed a lot".

Duos & rivals

3 SPOTS

Head-to-head stats for every pair of players who've shared a pitch. Backed by every fixture in the app's history, refreshed nightly. Same materialised data powers three different surfaces so it's noticed even if you don't visit Profile.

Stats tab

Duo of the Month hero card — highest win-rate pair with 3+ games together this month, sitting alongside Top Scorer / Wall King / Most Wins / Top GK. August's winner: **Callum Finch + Sheridan Winter**, 100% across 4 games.

Tonight tab

Best duo tonight — one line at the bottom of each published team card. "🤝 Best duo · Ross + Daren · 3W-1D". Pre-match banter without anyone doing anything.

Profile

Your top duos + biggest rivals — top 3 of each, season-scoped default with an All-Time toggle. Skips pairs with fewer than 5 fixtures so it doesn't render statistical noise.

Monthly personal review

PROFILE · EVERY 1ST

Per-player wrap of the month gone. Positive-only — highlights, streaks, favourite teammate. Not a leaderboard, doesn't rank you against anyone else.

Now

Tile on Profile ("📊 Your monthly review") deep-links to the most recent complete month. Also reachable at </profile/monthly/YYYY-MM> with prev/next month navigation.

1st of month

Auto-push at **08:15 UK** ("📊 Your August is in — Apps, goals, MOTM wins, favourite teammate. Take a look on your Profile.") — only to players who actually turned out that month.

What's inside

Apps · Goals · MOTM wins · DOTD nods · W-D-L · **Best game** of the month (impact score) · **Favourite teammate** (most shared fixtures) · **Turn-out streak** (consecutive months with ≥1 app).

First live push: 1 October at 08:15 UK, for September stats. August is browsable now via the Profile deep-link.

ROLLOUT & NOTIFICATIONS

P801 · PREVIEW

PREVIEW · NOT YET BROADCAST

Notification prompts (adoption push)

TONIGHT + PROFILE

Only 18 of 86 profiles have notifications enabled — meaning most of the group misses call-ups off the waiting list, voting-open pings, match-report releases, monthly wraps and Duo of the Month callouts. Two low-risk nudges to lift that:

✓ Completion card

The "👋 Complete your card" panel on the Tonight tab is now **7/7 fields**, not 6/6. New "🔔 Notifications" row with a one-tap Enable button. Ticks green as soon as any of your devices is subscribed — no double-nagging if you enabled on desktop and now open on phone.

🔔 Tonight banner

The existing top-of-tab prompt has been rewritten louder, with a punchier value prop ("You'll miss call-ups off the waiting list · voting opens · match reports · monthly wraps · duo callouts"). Dismissable for 7 days at a time.

How to check yours: on Profile the existing "Push notifications" card shows whether you're on and lets you toggle it. Once on, the five category chips let you mute individual streams (match night · results · money · club news · predictor) — absence = everything on, so nothing needed unless you want less.

Rollout plan

Announcements fire as feature-announcement pushes at 09:00 UK the morning after they're queued. Staggered so each one lands cleanly rather than blurring together.

ALREADY SENT · 31 AUG

🔔 **Injury list** — delivered to 18/18 subscribed devices.

THIS WEEK

👊 **Duos & rivals** — new card on Profile, hero on Stats, best-duo caption on each team when teams are published.

NEXT WEEK

📅 **Monthly personal review** — new Profile tile; primes people for the first auto-push on 1 October.

OPTIONAL THIRD SLOT

🔔 **Notification preferences** — meta-info about pushes. Ship if the monthly review push exposes people who want to fine-tune.

Also landed (not broadcasting)

Predictor Watch in reports now covers last-weekend MoW result AND this-weekend fixture · **MoW picker v3** stops the West Ham / Spurs monopoly by excluding clubs seen in the last 3 picks · **Balancer v2 bug fixes** (star cap now scales with team count, age-spread pass no longer silently disabled) · **Admin-only:** Decisions log, monthly sub-chase reminder + Chase-list callout on Club Finances.

Feedback welcome. Anything confusing, anything you'd word differently, anything that behaves oddly on your phone — tell me and I'll fix it before the broadcast goes out. If it all reads right, that's an equally useful answer.
