PENALTY SHOOTOUTS · UPDATE

P520 · UPDATE

TL;DR — In the spirit of the World Cup, **drawn games now go to a penalty shootout**. The shootout winner takes a **+1 bonus point** in the table. Nothing else about a normal win or loss changes. **Shootout pens are not goals** — they don't touch the top-scorer race, though they might sway the MOTM / DOTD chat.

► The new scoring, at a glance

WIN IN NORMAL TIME

3

unchanged

DRAW

1

each team, as before

WIN THE SHOOTOUT

+1

bonus, on top of the draw point

So a shootout winner finishes on **2** and the loser on **1** — a shootout win is worth **more than a draw, less than a proper win**. A regulation win is still the full 3.

Worked example. Reds 2–2 Blues, Blues win the shootout → **Blues +2 pts** (1 draw + 1 bonus), **Reds +1 pt**. If Reds had won 3–2 in normal time it'd be the usual 3–0 pts split — no shootout.

► Where it happens

Entirely inside **Admin** → **Match Entry**, the same screen you already use to key in scores and scorers. There's nothing new to learn for a decisive game — the shootout controls only appear **when a fixture finishes level**.

Round-robin nights: every drawn fixture gets its own shootout.

PENALTIES — PICK WINNER

Reds FC

Blues FC ✓

① KEY THE LEVEL SCORE

Tap the score steppers as normal until both sides read the same — e.g. **2 – 2**.

② PICK THE SHOOTOUT WINNER

A yellow **Penalties** bar appears under the score. Tap the team that won on pens — it locks in yellow. Tapped the wrong one? Tap the other, or tap again to clear.

③ SUBMIT AS USUAL

That's it — the bonus point lands in the table automatically. **Submit stays locked** until every drawn fixture has a winner picked, so you can't forget one.

► The 0–0 special case

A goalless game still goes to pens — but the score steppers can't show a real **0 – 0** (walking both to zero just means "not played yet"). So for a goalless draw you'll see an explicit button first:

Reds FC

- 0 +

v

- 0 +

Blues FC

· mark 0-0 draw (→ penalties) ·

Tap **mark 0-0 draw** and the fixture records as a genuine goalless draw, then the same **Penalties — pick winner** bar appears. Pick the winner and submit.

► What it does to the table

The bonus flows straight into the **live table**, the published **result card**, and the **Stats "champion team"** — all three in step. In our example, the shootout nudges Blues one point clear of the side they drew with:

Team	P	W	D	L	GD	Pts
Blues FC ◀ won pens +1	1	0	1	0	0	2
Reds FC	1	0	1	0	0	1

Result cards spell it out too: ► DRAW · BLUES FC WIN ON PENS, and the copy-to-WhatsApp report adds "(Blues FC won on pens)" next to the score.

► What counts — and what doesn't

■ PENS ARE NOT GOALS

- No shootout scorers are recorded.
- The **top-scorer** race is completely untouched.
- Don't enter shootout pens in the scorers list.

► PENS CAN COLOUR THE NIGHT

- Voters can weigh a shootout hero (or villain) in **MOTM / DOTD** — that stays free-form, your call.
- The result card shows who won, so voters see it.

► What hasn't changed

- Decisive games — enter exactly as before. No shootout controls appear.
- A regulation win is still **3 points**; a loss is still **0**.
- Scorers, own goals, match report, highlights, MOTM/DOTD voting — all identical.

Trial run. This is in for tonight in the World Cup spirit. If the squad enjoys it, it stays for the coming weeks — the feature is fully built either way, so keeping it is just a thumbs-up, no rebuild.

Drawn game? → **enter the level score** · **pick the pens winner** · **submit**.
0-0? → **mark 0-0 draw** first. · Bugs / questions → admin in the WhatsApp group.
