

WANSTEAD FELLAS

FORMATION PICKER · UPDATE

P512 · UPDATE

TL;DR — Once teams are published on the **Teams tab**, **your team's** roster now shows a pitch below it — slots for goalkeeper, defence, midfield, attack. Pick your shape (2-3-1, 3-2-1, 2-2-2, ...), drop yourself and your teammates into positions, and settle the tactics before kick-off. **Anyone on the team can edit** — **start the argument early**.

► Where it lives

Teams tab, directly below the roster of the team you're on (badge says **YOU**). It appears the moment teams are published for the next Thursday and disappears when the result is entered. You'll see your team's roster and pitch — the other three teams show only their rosters, not the pitch.

BENCH · 0

Everyone's on the pitch.

Reading the pitch **top-to-bottom** = **attack** → **midfield** → **defence** → **GK**. Same orientation as FIFA: your keeper's at the base, you're attacking upward.

► How to pick a shape

The chips row across the top lists every formation that fits your roster size. Tap one and the pitch reshuffles. Auto-fill puts each player in their preferred position (see below).

2-3-1 DEFAULT	3-2-1 SOLID	2-2-2 BALANCED	3-1-2 COUNTER	1-3-2 GUNG-HO	1-4-1 MIDFIELD
------------------	----------------	-------------------	------------------	------------------	-------------------

Numbers read DEF – MID – ATT; goalkeeper is implicit. 5v5 (2-1-1, 1-2-1, 1-1-2) and 8v8 (3-3-1, 2-3-2, 2-4-1, ...) shapes also available when the roster size matches.

► How to assign a player

1 TAP A SLOT

Slot on the pitch — empty or occupied. It highlights yellow. A prompt bar appears below the pitch:

PICK
PLAYER
FOR MID

CLEAR
CANCEL

2 TAP A BENCH PLAYER

The bench pills below the pitch turn green while a slot is selected. Tap one:

MW M. Winter MID

SD S. Duncan ATT

Player drops into the slot; the pill disappears from the bench.

3 SWAP OR CLEAR

Tap an **occupied** slot to swap — pick a bench player and they take over (the previous occupant drops back to the bench). Or hit **CLEAR** to empty the slot.

► Auto-fill

The **AUTO-FILL** button top-right re-runs the suggerer:

1. **GK first** — anyone whose primary position is GK; otherwise the strongest secondary GK; otherwise whoever's left.
2. **Then DEF / MID / ATT rows** — matched by primary position first, then secondary, then whoever's left.

The more players have set a primary + secondary position on their Profile page, the better this gets. Currently 83% of the squad have set a primary; 4% have set a secondary (see the app engagement review — chase that number up and auto-fill practically does the whole job for you).

► Who can edit

► CAN EDIT

- Anyone on the team's roster
- Admin
- Parents acting on behalf of a linked child on the roster

■ NOT SHOWN

- The other three teams' pitches — you see their roster but not their formation. Focus on your own tactics.
- Reserves who didn't get subbed in — no pitch until you're rostered.

Consequence: If seven of you all live-edit at the same time on Thursday evening, last-write-wins. Don't overthink it — the shape is a talking point, not a legal contract. Talk it out in the group chat first if you're all about to fiddle.

► What it saves

- **Shape** — one of 20-odd formation codes.

- **Slots** — a map of slot → player, e.g. gk: Peter May, def_0: Daren Low, ...
- **Who last edited it** + when — for the audit trail if there's a dispute.

Save is auto — half a second after your last tap. Watch the header pill: **SAVING...** → **✓ SAVED**. No submit button.

► What hasn't changed

- Sign-up, sign-out, reserve promotion, WTP charges — all untouched.
- The team lineup itself (who's on which team) is still set in the Team Builder by admin.
- Match results, MOTM/DOTD voting, match reports — same as before.

► Coming next

- **Formation snapshot in the match report** — a small pitch thumbnail per team in the History view, so "3-2-1 vs 2-3-1, they overloaded midfield" becomes a visible narrative.
- **Position-played-per-player** — using the on-the-night formation to feed the stats engine, so a defender's 1 goal weighs differently to a striker's.
- **Captain badge** → **gated edit** — if the free-for-all gets messy, edit rights get pulled back to captain + admin.

Force-refresh the app · **Teams tab** · scroll to your team · pick your shape · argue about it.
Bugs / ideas → admin in the WhatsApp group.
