THE FELLAS' GUIDE · V2

P001 · GUIDE

What this is — five minutes from here, you'll know how to sign up for Thursday, vote for MOTM, check your stats, pay your fines, and play the World Cup predictor. Skim it, then keep it on your phone.

▶ Quick start

- 1 Open the app link your captain sent you.** Tap [Sign up](#) → email + password. Confirm your name when prompted. That's it — you're in.
- 2 Install it on your home screen** so it behaves like a proper app:
 - iPhone (Safari):** tap the share icon → [Add to Home Screen](#).
 - Android (Chrome):** tap the menu → [Install app / Add to Home Screen](#).
- 3 Pick your position.** The app will nudge you the first time you visit Next Game — tap your spot (GK · DEF · MID · ATT). Helps the auto-balancer build fairer teams.

▶ The five tabs at the bottom

Next Game	Teams	Match	Stats	World Cup
-----------	-------	-------	-------	-----------

Next Game	Mark yourself In or Out for Thursday. See the playing list, reserves, weather, kick-off, who's still missing.
Teams	Wednesday evening onwards — see who's on your team and what colour you're playing in.
Match	Tonight's live score, fixtures, voting, then the match report once the game's done.
Stats	Top scorers · awards · The Wall · winning team · distance · fines — full leaderboards by category.
World Cup	(During tournaments only) Predictor, sweepstake, your picks.

A **More** menu (⋮ top-right) holds your profile, finances, fitness uploads and a few extras.

▶ Your week, in three days

WEDNESDAY Sign up by 10pm Open Next Game → big green I'm In . Changed your mind? Drop Out before 10pm. cap = 32 9pm K.O.	THURSDAY Play + vote Afternoon: check Teams for your line-up + colours. House rules baked into the app

- Cap:** 32 confirmed per Thursday (sometimes 36 for special weeks). Extras go to [reserves](#).
- Priority order** when bumping for a slot: [subscribed](#) > [paid casuals \(WTP+\)](#) > [casuals \(WTP\)](#).
- Late drops:** if someone drops late, the highest-priority reserve gets pulled in automatically.
- Voting closes 10am Friday.** No late votes.

✓ I'm In — Tap to Drop Out

- **Masthead row** — weather, signup count, tonight's format (7v7, 9v9 etc.).
- **Position nudge** — only shows if you haven't picked your position yet. One tap to set it from here, no need to visit Profile.
- **Big I'm In / Drop Out button** — green when you're in, yellow when you're on the waiting list.
- **My Squad pill** — if you manage a kid's account, their In/Out toggle sits as a small pill next to yours.
- **Search box** — type a few letters to jump to a name in any of the lists.
- **Who's In · 14** — the playing list. [Your row is highlighted in green.](#)

Player tier dots

Each player row has a coloured dot showing their tier:

Subscribed — pays monthly ·

WTP+ — priority casual, £5/game ·

WTP — casual, £5/game

► Common how-tos

The match is full — what happens?

You'll join the **reserves**. The list is auto-ranked by tier (subscribed first, then WTP+, then WTP by sign-up time). If anyone drops out, the top reserve gets bumped into the slot — no admin needed.

I want to sign up my kid

If admin has linked your child to your account, you'll see them on Next Game as a small pill next to your I'm In button. Tap it to sign them up; tap again to drop them.

I need to drop out

Tap your green **I'm In** button → confirm. If anyone's waiting, your slot goes to the top reserve automatically. [You can change your mind later but you may not get your spot back.](#)

What if I miss the 10pm deadline?

Sign-ups are locked. The captain can still slot you in via admin tools if there's room, but message in WhatsApp first.

Why can't I see "Not In"?

The "Not In · 59" list is admin-only — keeps the page clean for everyone else.

The status of your sign-up is always written on the big button:

✓ I'm In · On the Waiting List · Reserve (was confirmed, got bumped)

► Match tab — voting (Thursday night)

While the game's running, the captain enters scores live on the Match tab. After full time, the voting card opens at the top of the page.

CAST YOUR VOTES

✓ — · 14/32 voted · closes Fri 10:00

Search 32 players...

Beau Samuels 2 ● ○
Edward Ezra ○ ●

- **One row per player** — tap for MOTM and for DOTD. Both votes in one scroll.
- **Goalscorers are sorted to the top** with a tag so MOTM candidates surface without scrolling.
- **Search box** filters live as you type.
- **Change your mind** anytime until 10am Friday.
- **Two pills top-right** show your progress: ✓ means MOTM cast, ✓ means DOTD cast.

Voting closes **Friday 10:00 AM**. Winners auto-publish on the Match tab, where the card morphs into the result.

Match report

Friday morning the report drops on the Match tab — scorers, MOTM/DOTD, league table for the night, key highlights, banter, app watch (World Cup chat). Older reports live on [History](#) (under **More**) — tap any prior Thursday to expand.

► Stats tab — the league leaderboards

The Stats page is a dashboard, not a menu. The top section always shows three **hero cards** with the season leaders:

Top Scorer

Beau Samuels

14 goals

Wall King

Mark Pearson

1.50 GA/night

Below the heroes, panels grouped by theme:

SECTION	WHAT'S IN IT
Attack	Top Scorers
Awards	Man of the Match · Winning Team (with current streak)
Defence	The Wall — goals conceded per night, lower is better
Participation	Appearances · Distance per game · Total distance
Shame	Dick of the Day · Fines

How to read each panel

Every panel shows a **top-3 podium** right under the title (gold · silver · bronze) — that's the league leaderboard for that category at a glance. Tap the panel to expand for the full ranked table.

1	Beau Samuels	14
2	Josh Edwards	10
3	Mikel Winter	9

Other controls

- **This Month / All Time** toggle at the top — flips the whole page between the two views.
- **My Stats pill** at the top jumps you straight to your player card.

► Your Profile

Open via **More** → **My Profile** or tap your avatar at the top of any screen. You'll find:

- **Your Top Trumps card** — overall rating + six attributes (pace, shooting, passing, dribbling, defence, physicality) or GK stats if you're a keeper. Updates as the season goes on.
- **Preferred position** — pick a **primary** and an optional **backup**. Used by the team balancer (so every team gets a striker, a defender and a GK) and feeds future position-aware leaderboards.
- **Photo, name, age group, favourite club** — set once, easy to change.
- **Match fitness** — add post-match GPS data (see below).
- **My Finances** — your running balance.

Position picker

Four buttons. Tap once for **primary**, tap a second to set a **backup**, tap again to clear. Helpful if you're "happy at MID, can play DEF in a pinch."

DEF

MID

ATT

Add match fitness

On your player card, tap **+ Add match fitness**. Either upload a **.gpx** or **.tcx** file exported from your watch app (Polar, Garmin, Strava), or type the numbers in by hand. Re-uploading for the same date replaces the previous entry.

► My Finances

Open via **More** → **My Finances**. Two sections:

- **WTP Games This Month** — for casual players, a £5 fee is now added automatically whenever you sign up confirmed for a Thursday. The panel shows count + £ total + per-game lines.
- **Outstanding Fines** — any lateness / drop-out / cunctiness charges, with date and amount.

Big number at the top tells you what you owe. **"All clear ✓"** means you're paid up.

► World Cup tab

Appears at the bottom of the app during tournaments. Four sub-tabs:

Hub	Upcoming fixtures (today + tomorrow) with your picks · leaderboard preview.
League	Full predictor standings. % is your hit rate across all settled matches.
My Picks	Your scorecard — what you predicted, what's still locked.
Sweep	The £240 paper sweepstake digitised — pot, prizes, ownership grid, leaders for Most Conceded and Most Reds. Your teams highlighted in cyan at the bottom.

Picks lock 5 minutes before kick-off. Miss it and that match counts as a wrong pick — the leaderboard denominator is total settled matches, not just the ones you predicted. Set a phone reminder for early-morning games.

► When something looks wrong

1. **Force-refresh first.** iPhone: swipe up to close the app, then re-open. Desktop: **Cmd+Shift+R / Ctrl+Shift+R**. Most "weird" data is a cached old view.
2. **Check your phone has signal** — most live features need it.
3. **Still wrong?** Drop the admin a message: **pabarham@gmail.com** or in the WhatsApp group. Include a screenshot and what you were doing.

That's the lot. Now go have a kick around.
