PREDICTOR GAMES · LIVE FOR 2026-27

P525 · UPDATE

TL;DR — Two new season-long games are live in the [Predictor](#) tab. [Match of the Week](#) lands every Monday morning with one auto-picked fixture and takes 10 seconds to play. [Season Card](#) is a one-off form of 7 season-long predictions that locks 1h before the PL opener on **Fri 21 Aug 19:00** — get in early. Free to play, bragging rights only.

► The two games at a glance

MATCH OF THE WEEK

One PL / Championship fixture per week, **auto-picked** by which teams the group supports. Pick a scoreline before kickoff. Everyone plays.

WEEKLY · 10 SECONDS TO PLAY

SEASON CARD

A one-off form of **7 season-long predictions**. Fill it in once before the season, we score it as each market resolves through the year.

ONCE · LOCKS 21 AUG

Match of the Week

Every Monday morning, the app auto-picks a marquee fixture from the coming weekend. It weights the pick by [favourite_club](#) affinity — a Millwall fan's derby beats a random 3pm kickoff — with a "recently-picked" penalty so West Ham fixtures don't dominate every week. You pick a scoreline; it locks at kickoff.

EXAMPLE — THE FIRST TWO PICKS

WEEKLY RHYTHM

Mon 08:00

Fixture drops. Push notification to everyone — " This week's MoW is X v Y, kicks off Sat 17:30. Get your pick in."

Mon - Kickoff

Picks open. Tap +/- steppers to set both scores, hit Submit. Change your mind any time before kickoff.

Kickoff → FT

Locked. Panel shows your pick + everyone else's who got in. Awaiting the result.

Mon after

Result poll runs against football-data.org, points cascade automatically, " Result in — you got X pts" push fires. Season leaderboard updates.

Season Card

The season-long predictor. **Seven markets, one form, fill it in once.** The card locks 1h before the PL opener on **Fri 21 Aug 19:00 UK**, then reopens for a **2-day edit window on 2-4 Sept** so you can react to the summer transfer window. After that, locked for the year.

THE SEVEN MARKETS

MARKET	PICK	POINTS
Premier League Champion	1 club	10
Top 4 – Places 2/3/4	3 ordered slots	3 / 1 per slot
Relegated – 18/19/20	3 ordered slots	3 / 1 per slot
Golden Boot	1 player	10
Playmaker (most assists)	1 player	15
First manager sacked	1 manager	10
Championship promoted (Ch/Ru/PO)	3 ordered slots	3 / 1 per slot

Ordered slots: **3 pts** if the exact team is in the exact slot, **1 pt** if you had the right team in the wrong slot. Max **72 pts** for a clean-sheet season.

Grand-slam bonus: +25 pts if you somehow get **every** market at max points. Silly-hard, but the reward is there. Season ceiling: **97 pts**.

HOW YOU PICK

- Each market opens a **bottom-sheet picker** — searchable, shows club crests, favourites-first for clubs, alphabetical + type-to-search for the ~500 PL players.
- Auto-saves as you go. No big Submit button — every pick writes immediately.
- Header shows a live countdown to lock and a running **N/13 picked** tally so you can see how complete your card is.

WHO PICKED WHO?

Private until lock, public after. Before Fri 21 Aug, only you see your picks — nobody's copying anyone. Once the lock fires, each market shows a **N picks** chip that opens a bottom-sheet with every fella's pick + a consensus strip (top 3 most-backed options). All season, the debates keep running.

SEASON TIMELINE

Now → Fri 21 Aug

Card open. Pick your 7 markets whenever. Bring your best takes.

Fri 21 Aug 19:00

Card locks. 1h before the PL opener kicks off. Public visibility flips on — everyone can see everyone's picks.

2-4 Sept

Edit window. 2 days after the summer transfer window closes — swap Golden Boot picks if their move fell through, rethink first-sacked, etc.

Nov onwards

Markets resolve rolling. First-sacked usually first (Nov / Dec), Championship promoted in May, Golden Boot / Playmaker / PL Winner in May. Points land in the leaderboard as each one settles.

► How to play — 30 seconds

1. Open the Wanstead Fellas app → tap **Predictor** on the bottom nav.
2. Two tabs at the top: **Match of the Week** (default) and **Season Card**. World Cup archive lives to the right of them.
3. **MoW**: tap +/- to set both scores, hit Submit. Done in 10 seconds. Comes back to you next Monday.
4. **Season Card**: tap each of the 7 markets, use the searchable pickers. Auto-saves as you go. Bring it back before **Fri 21 Aug 19:00**.
5. Notifications opt-in on the Tonight tab if you haven't already — that's how you'll hear when picks open, lock, and settle.

Free to play. No stakes, no fines for wrong picks, no admin. Bragging rights only. If it takes off, we'll talk about a stake for 2027-28.
