

WANSTEAD FELLAS

NEXT GAME · REFRESH

P503 · UPDATE

TL;DR — The Next Game tab is now far less of a scroll. The 73-row wall of signups has been broken up with a search box, coloured tier dots, a tighter masthead, and a collapsible Not-In list for admin. [Force-refresh the app and have a look.](#)

► What's new at a glance

- **Search box** at the top of the lists — type a name to jump to it.
- **Coloured tier dots** replace the cryptic SUB / WTP* / WTP suffixes.
- **Consolidated masthead** — weather + signup count + format share one row.
- **Smaller My Squad pills** for kid toggles, so they don't compete with the main I'm In button.
- **Not In** (admin only) now collapses by default, with tier filters + sorted by recent attendance.

► Tier dots — what the colours mean

Every player row used to end in a small text label (SUB / WTP* / WTP). Four flavours of the same word at 10pt is hard to scan. Now it's a single coloured dot:

-  **Subscribed** · pays monthly
-  **WTP Priority** · £5/game, jumps the wtp queue
-  **Casual (WTP)** · £5/game

► Consolidated masthead

Weather, signup count and game format used to stack as three separate full-width cards. Now they share one row:

FORECAST

22°C · 8mph

SIGNED UP

14/32

FORMAT

7v7 · 2 teams

► Search

A search box appears above the player lists (whenever there are more than ~10 players in the squad). Type a few letters and the IN, Reserves and (admin) NOT IN lists all narrow instantly.

► Admin: Not-In is now manageable

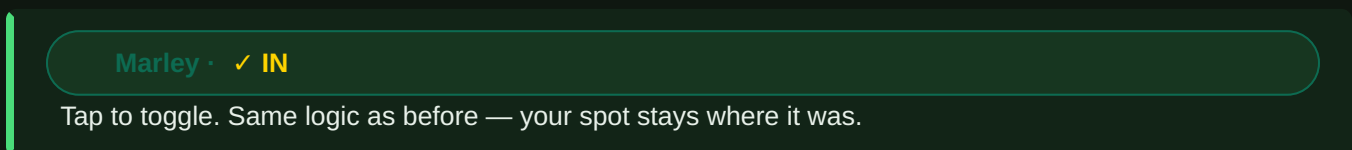

With 70+ profiles on file, the old Not-In list was a 50-row alphabetical scroll. It's now collapsed by default. When opened:

- **Filter chips** — All / Subscribed / WTP, with live counts.
- **Sorted by recent attendance** — likeliest-to-play surface first, not alphabet. The "6 of last 8" badge tells you who's a regular vs occasional.
- **Tap the section header** to expand/collapse.

► My Squad — smaller pills

Previously each kid took a full-height row right under the I'm In CTA, competing with it for attention. Now they're compact pill buttons that stack horizontally:

► What hasn't changed

- Sign-up logic, reserve promotion, signup cap (32) — all untouched.
- The I'm In / Drop Out CTA still does exactly what it did.
- Last-result card at the bottom still links into Match.

Force-refresh the app · tap **Next Game** · feel the difference.
