CARD RATINGS REVIEW · COMMITTEE SIGN-OFF

P515 · PROPOSAL

The ask. Sign off six proposed card-rating tweaks based on the last ~11 matches of data (May 22 → Jul 2). The current cards are, on the whole, accurate — this is a small correction pass, not a rebuild. [Nothing goes live without committee green light.](#)

► How we decided

Four signals used:

- **Goals per game** → the shooting rating on the card
- **MOTM votes** → the overall rating (what teammates think of you)
- **DOTD votes** → the cuntiness score / tier
- **Fitness data** → pace and physical ratings (currently only 1 player tracks — inert signal until Strava auto-import ships)

Guard-rails: minimum **4 appearances** before we act on the numbers; changes capped at **±2 per rating** in a single pass so nothing snaps. Data confirms the current card for the top scorers already at 9-10 (Beau Samuels, Josh Edwards, the Winter twins) — no changes there.

► Proposed changes (6)

PLAYER	POS	WHAT CHANGES	DECISION	WHY (DATA)
Noah Higgins	ATT	Shooting 5 → 8 Pace 6 → 8	☐ APPROVE ☐ DISCUSS ☐ DEFER	8 goals in 11 games as our striker — the highest-scoring outfielder outside the elite Golds. The pace call-outs in match reports have been weekly. Biggest single mis-rating on the board.
Adam Thorpe	MID	Shooting 7 → 8	☐ APPROVE ☐ DISCUSS ☐ DEFER	3 goals in 5 games + a MOTM win. Efficient scoring return from a midfielder.
Stephen Pender	MID	Shooting 6 → 7	☐ APPROVE ☐ DISCUSS ☐ DEFER	3 goals in 6 games from midfield — running above his current shooting rating.
Rory Wilson	MID	Overall 7 → 8	☐ APPROVE ☐ DISCUSS ☐ DEFER	1 MOTM win in only 4 appearances — the strongest teammate vote-per-game rate in the squad. Bumps him to Silver tier on the card.
Tom Broughton	ATT	Cuntiness 5 → 7 Tier Scamp → Nuisance	☐ APPROVE ☐ DISCUSS ☐ DEFER	4 DOTD wins on 7 nominations in 11 games. Data-driven tier promotion — the group has clearly spoken.
Michael Farley	MID	Cuntiness 8 → 9	☐ APPROVE ☐ DISCUSS ☐ DEFER	3 DOTD wins on 9 votes. Right on the edge of tier promotion (Nuisance → Cunt).

What this validates. The current cards for Beau Samuels, Josh Edwards, Sheridan Winter (dad), Mikel Winter (son), David Edwards and Paul Barham are all backed by the data. No touching required — worth noting to the group that the ratings do actually reflect performance for the top end.

► Also worth knowing

- **Goalkeepers pending.** GK ratings need a separate pass with clean-sheet and saves data — will come back to committee with those once pulled. (Early flag: Callum Finch's MOTM in 11 apps suggests his GK ratings may be under-set.)
- **11 casuals have no card at all.** WTPs like Sam Yeats (3 goals in 1 game) inherit default 7s until admin fills them in. Not a rating problem — a data-entry job.
- **Fitness is a data desert.** Only 1 player uploads. Once Strava auto-import ships (on the roadmap), pace and physical ratings become properly data-driven for the tracked players.

Tick the boxes · reply **APPROVE** in the WhatsApp group and the changes go live by end of week.

Questions on any single row → admin will bring the underlying numbers to the meeting.
