

# WANSTEAD FELLAS

STATS PAGE · REFRESH

P502 · UPDATE

**TL;DR** — The Stats page just got a serious facelift. You no longer have to tap eight accordions to find anything. Headline awards sit at the top, every panel shows a top-3 podium under its title, and there's a brand-new defensive leaderboard. [Open the app, tap Stats, see for yourself.](#)

## ► What's new at a glance

- **Hero strip** at the top — three headline awards always visible.
- **Top-3 podium** under every panel — gold / silver / bronze, no tapping required.
- **The Wall** · NEW · a defensive leaderboard for goals conceded.
- **Sections** — Attack · Awards · Defence · Participation · Shame.
- **My Stats** pill — jumps to your player card.
- **One toggle** at the top — flip the whole page between This Month and All Time.

## ► The Hero strip

The three headline awards now live front-and-centre at the top of Stats. Gold for top scorer, silver for the Wall King (lowest goals conceded), bronze for most wins. Updates with the page-level period filter.

TOP SCORER

**Beau Samuels**

**14** goals

WALL KING

**Mark Pearson**

**1.50** GA/night

MOST WINS

**Geof Aiwerioba**

**4** wins

## ► Podium previews on every panel

Before: panels were collapsed by default and you saw nothing. Now: every panel shows its top three players right under the title — leader in gold, runner-up in silver, third in bronze. Tap the chevron to see the full ranked table.

### Top Scorers ▼

|   |                     |                 |
|---|---------------------|-----------------|
| 1 | <b>Beau Samuels</b> | <b>14</b> goals |
| 2 | Josh Edwards        | <b>10</b>       |
| 3 | Mikel Winter        | <b>9</b>        |

**Bonus:** when several players are tied at the top (e.g. four players on 1 MOTM each) the panel collapses to a compact "[4-way tie at the top](#)" line instead of three identical bars.

## ► **NEW: The Wall — Goals Conceded**

A defensive counterpart to the Winning Team stat. For every completed match, we sum up the goals your team shipped across all three fixtures on the night, then rank players by their average per night. Lower is better. Minimum 3 nights played to qualify (2 if you're viewing This Month).

| The Wall · Goals Conceded |                |      | ▼        |
|---------------------------|----------------|------|----------|
| 1                         | Mark Pearson   | 1.50 | GA/night |
| 2                         | Geof Aiwerioba | 2.00 |          |
| 3                         | Lawrie Pointer | 2.50 |          |

Tap into the panel for your own personal stats card: **Your Avg GA** and **Clean Sheets** (nights where your team shipped zero).

## ► **Grouped into sections**

The old flat list of nine accordions is now grouped under five teletext-style headings:

■ ATTACK

■ AWARDS

■ DEFENCE

■ PARTICIPATION

■ SHAME

Fines and DOTD live at the bottom under Shame. Awards (MOTM, Winning Team) live near the top where they belong.

## ► **My Stats pill + global toggle**

Above the hero strip you'll find a green **My Stats** pill (tap it to jump to your player card) and a single **This Month / All Time** toggle that filters every panel and hero card at once.

PB My Stats >

This Month

All Time

## ► **What hasn't changed**

- The **full ranked tables** are still there — they're just one tap behind the chevron now.
- The **Fines** filter chips (All / Late / Drop Out / etc.) still work the same way inside that panel.
- Voting, sign-ups, the World Cup hub, fixtures — all untouched. Stats only.
