

WANSTEAD FELLAS

CLUB FINANCES · UPDATE

P521 · UPDATE

TL;DR — Every sub, WTP fee, fine, pitch invoice and off-app credit now lives in the app, folded into a single running balance on the new [Admin → Club](#) tab. As of **12 Jul 2026** the app agrees with the [Wanstead Fellas Treasury](#) bank pot **to the penny** — and we can now project the end-of-season position for the first time.

► The pot at a glance

TODAY (12 JUL)

£3,089

matches bank pot

STILL TO COLLECT

£85

unpaid WTP + fines

REMAINING PITCH

£2,306

Aug 2026 → Mar 2027

PROJECTED END-OF-SEASON

£868

before any new spend

► Where it lives

Everything is on the new **Club** tab inside Admin (between Finance and Families). Three sections stacked:

- **Balance callout** — the live pot, computed on the fly from every source below.
- **Subscriptions** — one row per subscribed player for the 2026-27 season, with a [Mark paid](#) toggle. All subs are already ticked off — nothing outstanding.
- **Expenses by month** — every pitch invoice (Apr–Jul paid, Aug–Mar pre-seeded unpaid), the pre-season footballs, and an [Add expense](#) button for ad-hoc items (equipment, food, tournament, other).

► What folds in, what folds out

Source	What it is	Season to date
Subs	£95/season × subscribed players (a few on £47.50 half-subs) table: club_subscriptions	+ £4,132.50
WTP fees	£5 per pay-per-play appearance, auto-charged from the roster table: wtp_games (auto-generated)	+ £110
Fines	Late sign-up / late cancellation, auto-charged table: fines (auto-generated)	+ £53
Other income	Season-transition carry-over + off-app spreadsheet fines (see below) table: club_income	+ £331
Pitch hire	Apr–Jul monthly invoices, paid from admin's account and reimbursed table: club_expenses (category = pitch_hire)	– £1,220.40
Equipment	10× match balls, purchased 26 Mar for start of season table: club_expenses (category = equipment)	– £81
= Today's balance (folds to bank pot)		£3,089.10

Why "folds to bank pot" matters. Before this feature, cash was tracked in a mix of spreadsheets and my head. Now the app [is](#) the source of truth — every credit and debit on the [Wanstead Fellas Treasury](#) statement maps to a row inside the app, and any drift shows up on this tab straight away.

► The reconciliation story

Rolling every bank line back to a specific app row uncovered **£331** of income that had no home — a one-off catch-all that now sits as a single [club_income](#) row dated 1 Apr 2026. Composed of:

- Overpayments bundled with subs (Davies +£65, Sherman +£40, Perrie +£25, etc.)
- Past-season settlements paid after 1 Apr — labelled May/Jun payments not tied to specific WTP rows
- Josh Edwards' **£10 sub discount** for his 2 pre-app April WTPs (why the bank shows £85 not £95)
- Off-app spreadsheet fines cleared before the auto-fine flow shipped

Going forward this number should stay flat or shrink — every new bank credit lands via the app first. If we ever want per-player granularity restored, we walk each May/Jun bank line back to a specific WTP row and the catch-all decreases accordingly.

► Pitch hire — the split rate

APR → 27 AUG 2026

£67.80

per Thursday, invoiced **monthly** — Pitchbooker ad-hoc bookings, paid by admin's card and reimbursed from the treasury

3 SEPT 2026 ONWARDS

£70.17

per week, **Pitchbooker subscription** — Eton Manor Half 1 + 2, 9–10pm every Thursday, valid indefinite. Only **24 Dec 2026** excluded

All 8 upcoming monthly rows (Aug £271.20 · Sep £280.68 · Oct £350.85 · Nov–Mar £280.68 each) are already seeded and unpaid — tick each one as its withdrawal hits the bank. Total remaining: **£2,306.13**.

► Known quirks (already handled)

FELIX BAKER

Shares his dad Guy's £95 sub. When both play the same week he flips to WTP and gets charged £5 instead. **No sub row for Felix.**

HALF SUBS (×3)

Aaron, Beau and Chay each pay **£47.50** for the season. Long-standing arrangement — data-only, no schema flag. Fourth one? Just set **amount = 47.50**.

THE £331 CARRY-OVER

Single 1-Apr row in [club_income](#) capturing everything that pre-dates the auto-flows. Sits in [Add expense](#) → [source dropdown](#) as **carry_over** if we ever need to add more.

CHAY'S DUPLICATE PROFILE

Two rows for the same person, from before he auth'd. The older stub gets merged into the auth-owning one in the next data-cleanup pass — same pattern as the Chris Hughes fix.

► What's coming next

- **Player-facing sub card** on Profile — "You paid £95 on 04 Apr 2026 · you're good until Mar 2027" — so the sub status is visible to the fella not just the admin.
- **Admin UI for club_income** — currently SQL-only; a simple form so donations / prizes / one-off credits can be logged without a migration.

- **Monthly pitch-invoice auto-cron** — a job on the 1st of each month drops in the next unpaid pitch row so it never has to be manual.
- **Match line-by-line settlement** — optional data hygiene pass to walk each May/Jun WTP bank line back to a specific row and shrink the £331 catch-all towards zero.

App balance = £3,089.10 · Bank pot = £3,089.10 · Projected March close ≈ £868.
