

What this is. A one-glance summary of what the app does today and what's queued for the coming months. Anything caught your eye — feature-level detail is in the primers (in the app, [Feedback](#) tab / on GitHub) and the live roadmap. Detail on any single item available on request.

► What the app is for

Wanstead Fellas is a mobile web app that runs the whole Thursday-night football operation end-to-end — from Friday sign-up through match-day tactics to voting, fines and stats. It also carries the seasonal extras (World Cup predictor, sweepstake) that keep the group engaged between kick-offs.

OPERATIONS

Runs the weekly cycle with as little admin nudging as possible

STATS THEATRE

Every match generates story, cards, awards

IDENTITY

Your card, position, foot, badges

FAIRNESS

Balanced teams, transparent ratings, chased fees

COMMUNITY

Voting, banter, kids on My Squad

► The weekly rhythm — all handled by the app

FRI 10PM

Sign-up opens

In / Out toggle · reserves auto-promote when someone drops

WED 10PM

Lineup locks

Balancer builds teams · captains picked · publish to WhatsApp

THU 9PM

Kick-off

Formations · live scores · scorer entry

THU 10PM

Voting opens

MOTM / DOTD ballot · WTP fees post · match report follows

► What's live today

Match operations

- In / Out sign-up with waiting list & auto-promotion
- Player tiers (subscribed · WTP priority · WTP)
- My Squad — parents manage linked kids
- Weather forecast for Wanstead Flats 9pm
- Drop-out confirmation to prevent misfires

Team building

- Auto-balanced snake draft (position-aware)
- Auto-picked captains from top 3
- Draft autosave · publish generates fixtures
- WhatsApp export with DEBUT tags & talking points

Match tab (live)

- Round-robin fixtures & live league table
- Per-fixture score + scorer entry
- **Formation picker** — every team gets a pitch, anyone in the roster can pick shape and drop mates into positions

Post-match awards

- Single-pass MOTM & DOTD ballot (one scroll)
- Goalscorers sort to the top of the ballot
- Structured match report — predicted vs actual · key highlights · team awards · banter · app watch

Identity & cards

- Profile — photo, DOB, club, age, position, foot
- FIFA-style Top Trumps card (Gold / Silver / Bronze tiers)
- Badges (Legend, Captain, Super Sharp Shooter ...)
- Position & foot pickers with post-login nudges

Stats theatre

- 7 leaderboards — goals, MOTM, DOTD, fines, apps, distance/game, total distance
- Month / all-time toggle
- Position filter (Top 3 by role)
- Match history archive with predictions retained

Money & enforcement

- WTP £5 fee auto-charges the morning after the match
- Fines (Late £2, Lost Ball £3, Cuntiness £5, Drop-out £2)

Fitness

- Manual per-match entry, or TCX/GPX from watch/app
- Distance leaderboards

- Credits for overpayments and goodwill
- 2-week grace → blocked from sign-up until settled

- Suggested tweaks to Pace / Stamina / Work Rate

Seasonal extras

- World Cup Predictor — group 1X2 · knockout 6-way
- Streak leaderboard (current + best)
- Sweepstake — team status card, prize structure
- Pods — car-share & group info

Admin

- Player editor (stats, cards, badges, photos)
- Finance panel (fines, WTPs, credits, blocks)
- Families, feedback, cup admin, sweepstake admin
- Delegate roles (e.g. score entry — Ross Marks)

► Roadmap — what's queued next

Grouped by theme. Everything below is either agreed and in the queue (), proposed but not yet scheduled (), or has a dependency () blocking release. Committee steer welcome on ordering.

Team tactics

FORMATIONPICKER JUST SHIPPED

Next: Formation snapshot in match report (small pitch thumbnail per team in History) · position-played-per-player capture (feeds smarter stat weighting) · captain-gated formation edits (if free-for-all gets messy). In-app team chat is parked — WhatsApp already covers it.

Voting engagement

44% TURNOUT — CEILING TO LIFT

Next: web push at full-time ("Vote for tonight's MOTM") · nav badge on Match tab when ballot open · voting streak counter · live social proof ("14 voted · 22 haven't") · Friday-morning results-reveal push. Peer-rating features (below) inherit voting turnout as a ceiling, so this ships first.

Peer ratings

BLOCKED ON VOTING ENGAGEMENT

Design: a third inline column on the MOTM/DOTD ballot — rate each teammate great · OK · off. Default so no added friction. Feeds a small adjustment to the player's card rating (capped, Bayesian shrinkage for low sample size).

Balancer v2

POSITION GATE CLEARED (83%)

Design: categorical balance (attribute spreads within $\pm X$) · star cap (max $2 \geq 85$ OVR per team) · defender floor (≥ 1 with $DEF \geq 8$) · simulated annealing · rematch penalty. Target: drop average score margin from $\sim 2.5 \rightarrow \sim 1.5$ goals. Admin escape hatch (drag-swap + regenerate) stays.

Rating engine (live cards)

CURRENTLY ADMIN-SET — GOING LIVE-DERIVED

Design: shooting from goals/appearance, defence from clean sheets, pace from fitness top-speed, physical from distance $\times$ HR-zone workload, passing from peer ratings. Nightly cron recomputes; deltas logged; form arrows (↗ / ↘) on cards; "Why this rating?" tooltip for transparency. Bayesian shrinkage for low-appearance players and MOTM/DOTD-influence capped to stop gaming.

Money & enforcement

CORE DONE — AUTOMATION LEFT

Next: Stripe / online payment ("settle in one tap" from the app) · auto-apply credit when payment recorded (one entry, not two) · player-facing "you owe £X — pay by Sat" reminder · all-time finance view for the chase list.

Adoption

THE FITNESS GAP: 1/49 UPLOADING

Design: "Most Distance Tonight". hero card on Stats · fitness line on player cards · Friday-morning nav badge on Cards for signed-up players · Strava connect-once auto-pull · "Complete your card" 30-second onboarding flow at first login · photo nudge on Cards tab (still 37 photo-less). The features are built — nobody's using them because there's no payoff loop or nudge.

Data quality

NEW SIGNALS FOR THE RATING ENGINE

Next: position played per fixture (one-tap picker on match entry) · assists tracking (Veo recordings + shirt numbers being explored) · self-rated form Wednesday poll () · HR-zone fatigue index feeding the balancer.

Delegate roles

FIRST ROLE LIVE (ROSS MARKS · SCORING)

Next: Admin UI toggle to grant / revoke delegate roles per player · indicator on Admin profile page showing who holds each role · additional roles as needed (can_manage_fines, can_publish_teams).

► Where committee steer would land best

Three real choices ahead.

1. **Sequencing.** Engagement (voting push) vs Balancer v2 vs Rating engine — all sizeable. Which lands first?
2. **Ambition on cards.** Live-derived ratings are transparent but noisy. Do we ship with training wheels (admin baseline $\pm$ small drift) or go straight to fully derived?
3. **Payments.** Stripe integration is a bigger lift — do we want the frictionless "settle in one tap" or is cash-to-admin still fine?

Also worth knowing. Two features have adoption blockers we're aware of: Balancer v2 needs $\geq 80\%$ of regulars to have a position set (currently 83% — cleared), and Peer ratings need voting turnout above $\sim 65\%$ (currently 44%) or the signal is too thin to trust. Both are addressed on the roadmap above.

Full roadmap → the app's **Feedback** tab · deeper primer for any single item on request.
Committee questions → admin in the WhatsApp group.
